Statement of Appreciation

We had engaged the services of Pranav to develop a GUI for a Machine Learning based product being developed by us

Pranav designed the whole web application from scratch and made sure the application was made bug free. He designed a system where the menu and filters were designed in a way such that changes in a manifest file (JSON file) updated the UI keeping the structure intact. The transitions were made so smooth that it gave an effect of native application.

He was very prompt, responsive and appreciated the intricacies of our requirements remarkably well

I wish him a great success in his Endeavors

Arvind Dhupkar
